Kangaroos have been living in Australia for over 20 million years

DID YOU KNOW?

- Over 70 species
- Help prevent bushfires
- Communicate with their ears
- Their tail works like an extra leg
- Left-handed for precision
- Right-handed for strength
- Can rotate their ears 180° degrees with 360° hearing
- Barely emit any methane
- Usually give birth once per year
- Some kangaroos swim
- Have complex family structures
- Can feed in-pouch and at-foot joeys simultaneously with unique milk for each stage of development
- Have a small appetite and can go for weeks without drinking water

Children welcome

“Getting to know my local kangaroos has been an enriching and enlightening pastime. It has brought many smiles and even a few tears.”
